

# RESEARCH RISING:

CELEBRATING 75 YEARS OF THE  
GLENN RESEARCH CENTER

## NASA IS WITH YOU WHEN YOU FLY.

Many airport passengers have gazed across the runway and wondered what is behind the hangar bearing the bold "NASA" lettering. That landmark is an active hangar supporting flight research by the NASA Glenn Research Center which is celebrating its 75th Anniversary in 2016. Thanks to NASA, every U.S. aircraft and every U.S. control tower has technology on board to improve your flight.

NASA Glenn is one of the three original NASA centers, originally established as the Aircraft Engine Research Laboratory under the National Advisory Committee for Aeronautics (NACA), the predecessor to NASA. The fields to the west of Cleveland's airport, at the site of the National Air Races, were selected for the site of the new Aircraft Engine Research Laboratory. Groundbreaking ceremonies were held on January 23, 1941 for what is now known as "Lewis Field."

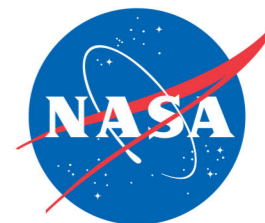

# CLE

TEMPORARY  
ART

EXHIBITION  
PROGRAM

[CLEVELANDAIRPORT.COM](http://CLEVELANDAIRPORT.COM)

CLE Temporary Art Exhibition Program was created to showcase the diversity of arts and culture of the Cleveland Plus Region. Museums, cultural institutions, art organizations as well as individual artists are afforded opportunities to exhibit their collections or original artwork and photography in the airport.

## ABOUT THE EXHIBIT

This collection of 10 original paintings by a technical illustrator and 26 photographs from their archives is designed to provide a retrospective on the Center's history, current research activities and future explorations. We thank you for helping us to celebrate 75 years of research rising.
